

ONE person in SEVEN suffers from one or more NTDs

Doing our part: comprehensive efforts to fight NTDs

Partnerships to boost R&D

186 R&D projects in the pipeline¹
3rd largest global funder²
USD 527.2 million invested in research³
88% of these projects are collaborative approaches

- We facilitate access to:
- Intellectual property
 - Compound libraries
 - Technical expertise
 - Know-how and data
 - Regulatory assistance

Medicine donations

We have pledged to donate an average of **14 billion** treatments for each of the ten years from 2011 to 2020

The 14 billion treatments over this period will help eliminate or control the nine neglected diseases that represent more than 90% of the global neglected diseases burden⁵

Capacity-building efforts

40 health partnerships combining prevention, training and treatment⁴

- We are working with partners to:
- Increase availability of existing treatments and vaccines
 - Strengthen health systems by equipping hospitals, providing medicines and supporting provision of safe water and sanitation
 - Train healthcare professionals and researchers on care delivery and R&D using creative tools and technologies
 - Raise awareness on diseases, prevention, and needed science-based regulatory policies
